Entry Shield **Product** **Offerings**

Protecting What Matters Most.®

Turnkey Security Screening

Protecting What Matters Most.®

"A safety system that does not impede the flow of traffic."

SCREEN & FLOW TECHNOLOGY

Screen & Flow Technology allows companies to help monitor what items individuals are bringing into their buildings. Entry Shield's proprietary system detects threats and instantly alerts the proper authorities. Powered by screen and flow technology, this real time detection system does not obstruct the flow of typical day to day traffic. The game has been changed, and now there is a modern defense against those wanting to cause harm in your community.

- 1 | Weapons Detector
- 2 | Good Traffic Flow

HOW DOES IT WORK?

As each person enters the building, all of their belongings are scanned by advanced weapon detectors. These detectors are not only looking for metal, they are processing thousands of algorithms identifying shapes of potential threats.

When a possible unauthorized weapon is detected, a picture or video is taken of the individual and sent to the proper authority or safety team member.

No external alarm is triggered, maintaining the anonymity of each individual. The threat may then be addressed privately. Finally, there is a system that provides safety measures without impeding the flow of traffic.

Full Security Software Suite

Protecting What Matters Most.®

ENTRY SHIELD SECURITY SOFTWARE

Patented Real-Time Security Management

Patented Real-Time Notification System

Instant push alerts with optional email backup. Actionable intelligence – see who, what, when, and where in seconds.

Response Alerts & Escalation Control

Mark "Verify OK," "Suspicious," "I'm Responding," "Send Backup," or "Call 911." Centralized view of all responses for rapid situational awareness.

On-the-Go Device & User Management

Easily manage hardware, doors, and users from your mobile or desktop dashboard.

Lockdown & Alerting Module

Trigger lockdowns or alerts with a single tap – compliant with Alyssa's Law requirements.

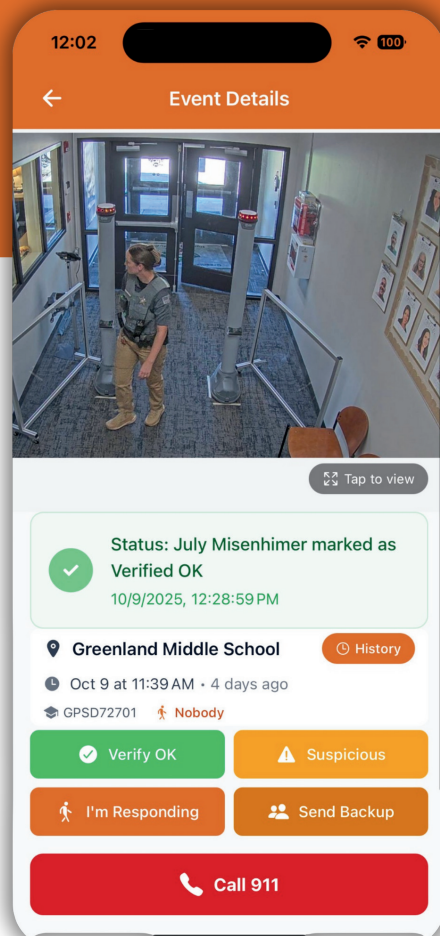

Document Repository (S.O.P. Hub)

Store and access critical emergency procedures, lockdown protocols, and school safety plans in one secure location.

Reporting Dashboard

Generate real-time event logs, audit trails, and compliance reports for administrators and law enforcement.

Entry Shield Software transforms security hardware into a connected ecosystem that enables instant notifications, verified responses, and streamlined incident management across any facility to **Protect What Matters Most**

Door Monitoring

Protecting What Matters Most.®

ENTRY SHIELD DOOR MONITORING SYSTEM

THE SMARTER WAY TO SECURE YOUR FACILITY

THE PROBLEM

Schools and facilities struggle with manual door audits, security vulnerabilities, and inefficient reporting tools. Without real-time insights, doors can be left unlocked, putting students and staff at risk.

OUR SOLUTION

Entry Shield's Door Management System (DMS) integrates with our mobile app to provide real-time visibility, control, and security over facility access points.

- ✓ **Automates Door Monitoring** – Provides real-time status updates and instant alerts, eliminating manual audits.
- ✓ **Enhances Security** – Delivers automated reporting and push notifications for doors that remain unsecured, ensuring quick response to potential security risks.
- ✓ **Boosts Efficiency & Compliance** – Streamlines access management, reduces costs, and provides security audit trails.

WHY CHOOSE ENTRY SHIELD?

- **Smart Automation** – Let technology handle door security so your staff can focus on what matters most.
- **Seamless Integration** – Works with Entry Shield's mobile app for centralized monitoring and control.
- **Proven Safety & Compliance** – Helps schools and facilities maintain security standards effortlessly.
- **Industry Exclusive** – We are the only solution on the market offering automated door monitoring with real-time reporting and push notifications for interior classroom doors.

Mobile Screening

Protecting What Matters Most.®

ENTRY SHIELD MBX

Patented Real-Time Mobile Security Management for any venue: football stadiums, gymnasium, courtyards, and field trips.

Patented Real-Time Notification System

Instant push alerts with optional email backup. Actionable intelligence – see who, what, when, and where in seconds.

Response Alerts & Escalation Control

Mark "Verify OK," "Suspicious," "I'm Responding," "Send Backup," or "Call 911." Centralized view of all responses for rapid situational awareness.

On-Demand Mobility

Use your weapons detection alerting system with Entry Shield in a courtyard, at football stadium, gymnasium or anywhere you need that extra layer of safety & security

AC or Battery Powered

extended run time on battery or can be AC powered based on whatever the situation calls for

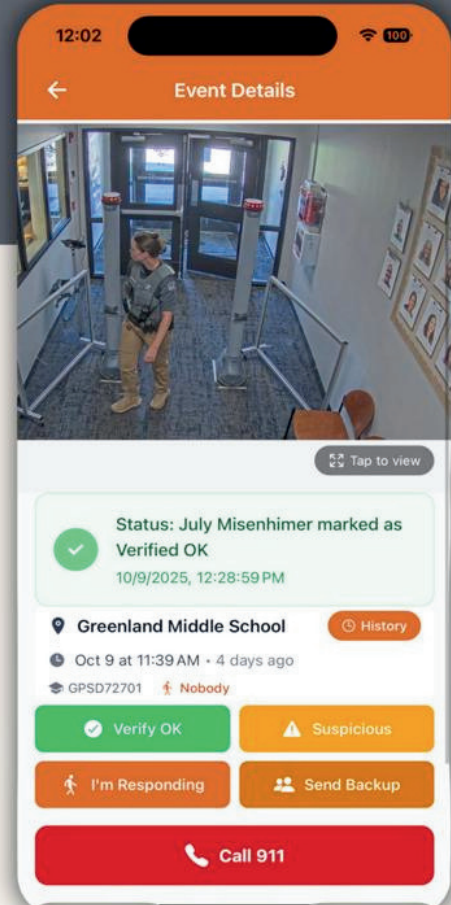

Wifi, Hotspot or Hardwired

Store and access critical emergency procedures, lockdown protocols, and school safety plans in one secure location.

Device management

Configure and deploy standards & sensitivity settings - Monitor uptime, batter life and create presets for redundant location settings

Entry Shields Mobile Box moves with your portable weapons detection systems creating a safe environment whenever and wherever safety & security are a priority. **Protect What Matters Most** all the time no matter where you are.

Use Case

OpenGate is the preferred solution for:

- K-12 school districts needing fast, non-invasive daily screening
- Stadiums, arenas & event venues managing massive crowds
- Government buildings & courthouses with secure public access
- Corporate offices & campuses enhancing workplace safety

Ceia OpenGate

Non-Intrusive Weapons Detection

OpenGate™ is a next-generation, open-frame weapons detection system engineered for environments that require high-throughput security without slowing people down. Unlike traditional metal detectors, OpenGate screens individuals as they walk through naturally, with no need to empty pockets, remove bags, or break the flow of traffic. It delivers advanced threat detection in a sleek, modern design built for schools, stadiums, government facilities, and large public venues.

Key Benefits

Fast. Accurate. Frictionless.

- *High Throughput:* Screens 3,600+ people per hour—perfect for busy entrances and peak traffic times.
- *Advanced Detection:* Identifies firearms, magazines, knives, and dense weapon components with remarkable accuracy.
- *Minimal Nuisance Alarms:* Intelligent algorithms dramatically reduce false alerts compared to legacy systems.
- *Bag-Friendly:* Scans backpacks and bags without stopping the line.
- *Portable & Quick to Deploy:* Lightweight design sets up in minutes—no tools, no wiring, no disruption.

Security Window Laminate

Protecting What Matters Most.®

ENTRY SHIELD PROTECTION

ENTRYSHIELD
ENTRYSHIELD.COM

“A window laminate that protects students and saves lives.”

SECURITY LAMINATE

SAFETY

IMPROVING SECURITY

We have enhanced school safety across the USA with over 100 installations.

STRENGTH

TWO LAYERS ARE STRONGER THAN ONE!

We install security laminate on both sides of the glass and seal it to the frame for extra protection (most use just one layer).

GUARANTEE

5-YEAR PRICE LOCK

Your quote today is good for 5 years with our price lock guarantee.

SUPPORT

FULL-TIME, DEDICATED, INSTALLATION CREW

We are proud to offer a full-time, dedicated crew that performs our installs. This is all they do.

WARRANTY

12-YEAR WARRANTY

Comprehensive warranty covering film, glass breakage, and seal failure for long-lasting protection and peace of mind.

VISIBILITY

CLEAR, TINTED, ONE-WAY & CUSTOM

We are geared to offer our customers options from clear, tinted, one-way and even custom logoed graphic options.

1 | Keep Intruders Out 2 | Buys Time for Response Force 3 | Affordable Layer of Protection

AI-POWERED

HIGH THROUGHPUT THREAT DETECTION X-RAY SCANNER **ES STREAM**

● Automated ● Compact ● High-Speed ● Dual View

ES STREAM is a cutting-edge bag inspection system combining advanced AI-powered software with state-of-the-art hardware to deliver unparalleled efficiency and accuracy.

Capable of processing 1400+ bags per hour the system ensures high throughput without compromising security.

The AI algorithms precisely detect and sort suspected bags automatically, providing comprehensive threat detection for various types of weapons, as well as suspicious high mass objects (potential IEDs), and other prohibited items.

Designed for easy installation and mobility, this system adapts seamlessly to high-traffic venues, stadiums, buildings, schools, museums and other public spaces.

S

SMART SCANNING

Places the burden of analysis on the equipment, not the operator

T

TRUSTED RESULTS

Superior detection with low false alarms

R

RELIABLE OPERATIONS

Robust design that is easy to operate

E

EVOLVING DETECTION LIBRARY

Guns, knives, flares & fireworks, vapes & e-cigarettes

A

ARTIFICIAL INTELLIGENCE

Sophisticated AI-powered algorithms

M

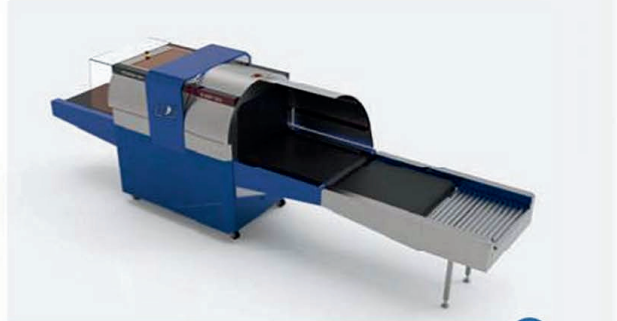

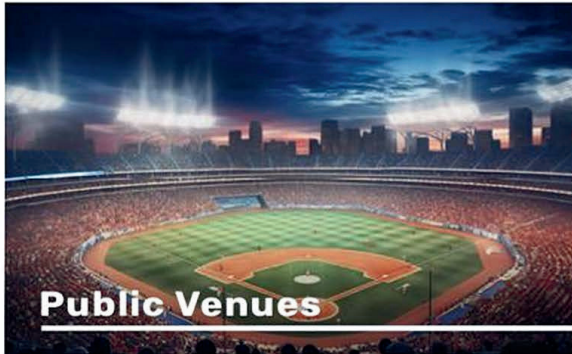

MODIFIED AESTHETICS

Available in a variety of colors and graphics

This system is designed to be easy to use and cost effective to operate. No extensive training or time-consuming image analysis is required, allowing operators to start using the system immediately.

One Solution Many Environments

entryshield.com

Upgrade your security framework by leveraging the latest in AI and X-Ray technology. Embrace the innovations that enable high-speed, accurate inspections, ensuring comprehensive protection.

Every scan is a testament to your commitment to safety and progress. Welcome to a new era where security is seamlessly integrated into everyday operations, providing unmatched assurance and peace of mind for all visitors and staff.

ES STREAM

AUTOMATED HIGH-SPEED AI
WEAPONS DETECTION SYSTEM IN
A COMPACT DESIGN

KEY FEATURES

3.5X faster than standard baggage scanners at 1400 scans per hour.

Expandable enhanced detection

Low operational cost

Synchronized screening - Person and bag move at the same pace

Reporting and real-time monitoring

Non-discriminative screening

Synergistic results

ES STREAM is a cutting-edge bag inspection system combining advanced AI-powered software with state-of-the-art hardware to deliver unparalleled efficiency and accuracy. Capable of processing 1400+ bags per hour, our system ensures rapid throughput without compromising security. The AI algorithms precisely detect and sort suspected bags automatically, providing comprehensive threat detection for various types of weapons, as well as suspicious high mass objects (potential IEDs). Designed for easy installation and mobility, this system adapts seamlessly to high-traffic venues, stadiums, buildings, schools, museums and other public spaces. Engineered to provide a revolutionary screening solution that balances top-tier security with a welcoming atmosphere, offering peace of mind in the face of evolving security challenges.

ES STREAM is designed to be easy to use and cost effective to operate. No extensive training or time-consuming image analysis is required, allowing operators to start using the system immediately. This reduces training costs and ensures quick deployment, providing high-level security without complex settings or operator intervention, making it ideal for high-traffic venues.

EXPERIENCE THE CUTTING-EDGE SOLUTION FOR HIGH-TRAFFIC VENUES, STADIUMS, BUILDINGS, SCHOOLS, AND OTHER PUBLIC SPACES

Unmatched Speed and Efficiency: Process over 1400 bags per hour at an unparalleled speed, redefining efficiency in security screening.

AI-Powered Precision: Utilizes advanced AI for accurate inspection and automatic sorting of suspected bags.

Easy Installation and Mobility: Sleek, easy-to-install design for quick setup and relocation at any event.

Comprehensive Threat Detection: Detect both metallic and non-metallic threats in bags, ensuring maximum safety for all attendees.

Enhanced Visitor Experience: Balance top-tier security with a welcoming atmosphere, while reducing wait times and improving the visitor experience.

Revolutionary Safeguarding: Upgrade your security infrastructure and embrace innovation, ushering in a new era of safety where every scan is a step towards a secure future.

Upgrade your security framework by leveraging the latest in AI and X-Ray technology. Embrace the innovations that enable high-speed, accurate inspections, ensuring comprehensive protection. Every scan is a testament to your commitment to safety and progress. Welcome to a new era where security is seamlessly integrated into everyday operations, providing unmatched assurance and peace of mind for all visitors and staff.

BV5030

SMALL AND ADVANCED X-RAY INSPECTION SYSTEM FOR QUICK AND EFFECTIVE CONTACT-FREE INSPECTION OF SMALL BAGS, BRIEFCASES AND BACKPACKS

KEY FEATURES

Artificial Intelligence software system for automated detection of firearms, knives and ammunition

The automatic identification of suspicious objects (drugs, explosives)

Availability of 7, 3 color and infinite color palettes of images

The fault-tolerant configuration of the acquisition/analysis workstation

Quick start-up and shutdown

Real-time self-diagnostics

The BV 5030 is a high-resolution, single view X-ray baggage inspection system with the ability to automatically detect prohibited objects and threats.

The tunnel with a width of 520 mm and a height of 320 mm is optimal for inspection of baggage, bags, hand luggage and parcels. The System may be used at inspection points of critical infrastructure facilities, law enforcement and security agencies, customs, border guards, hotels, event centers, educational institutions, sports arenas, and other places where reliable and uninterrupted operation of inspection systems is required.

The BV 5030 enables the identification of weapons, explosives, drugs and any other dangerous or prohibited items. Unique color palettes and touch control provide an exceptional level of operator efficiency.

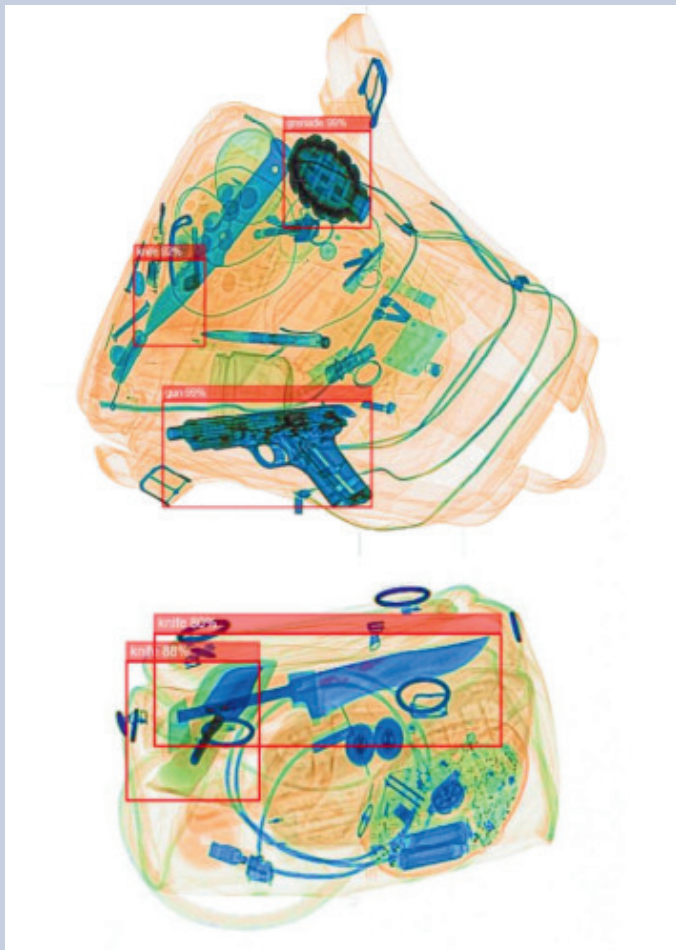

BV5030

OPTIONS

- ArtificialIntelligence software system for automated detection of firearms, knives and ammunition
- Additional (2nd) monitor
- Touchscreen operation functionality
- Ability to connect to a local network
- Remote operator position (up to 25 m)
- Monitor top position
- Rigid type packaging

ACCESORIES

- Roller tables with a length that is multiples of 0.5 m.
- Operator's desk with chair
- Operator's Workstation Stand
- Test objects kit
- Screwed-down feet (4 pcs.)

Examples of Images with Automatic Threat Detection by the AI Software System

Cell Phone Pouch

Protecting What Matters Most.®

Background

In today's digital age, managing student cell phone usage during school hours presents a significant challenge. The prevalence of cell phones in classrooms can be a major distraction, impacting student focus and overall academic performance. To address this issue, we propose the adoption of a new cell phone pouch with a magnetic locking system, designed to safely secure students' cell phones during school hours.

Product Overview

Our cell phone pouch, CellockED, is an innovative solution tailored to meet the needs of modern educational environments. Key features include:

Blocks Cell Phone Signals	Magnetic Locking System
Student Identification	Device Agnostic Design

CHALLENGES & POSITIVE ATTRIBUTES

Challenges	Positive Attributes
Durability	Premium Quality Materials: The pouch is constructed from durable, premium grade materials with a unique feature designed to block mobile phone signals (EMI/RFI shielding), ensuring maximum protection and productivity.
Security	Magnetic Locking System: The magnetic locking mechanism provides a secure solution, preventing unauthorized access during school hours.
Compatibility	Device Agnostic Design: The pouch is compatible with a wide range of cell phone models, accommodating all students' cellular devices including smart watches and hearing apparatus.
Sustainability	District Propriety: The cell phone pouches and magnetic detachers are owned by the District. Each cell phone pouch and magnetic detacher include a one-year warranty.
